EXCLUSIVE BACKDATE ✕ DESIGNED AND CRAFTED IN ITALY

ALL LABELEVEN VEHICLES ARE DELIVERED TO PORSCHE AG FOR THE FINAL "PORSCHE 100 POINTS TEST"

Lab Eleven is a family-run company born from the passion of the founder, Pino La Rosa and his daughter Milena, for Porsche cars. Based in Kitzbühel, Austria, the operational laboratory is located in Frankfurt am Main.

The company can count on a team with over 40 years of experience in restyling the German company's cars. More in detail, Lab Eleven specializes in the "backdate" of the iconic 911 model from the 1970s, that is, bringing the design of the car back to the glories of past decades but with the addition of modern components and technologies.

# Backdate

INSPIRED BY THE LEGEND

**PORSCHE 911 R  
1967**

Lab Eleven recreates the charm of the legendary vintage Porsches through a unique restyle back. In addition to the components respected in every minute detail, vintage fabrics, and a modern look thanks to cutting-edge technological components, the 911 takes on the characteristics of a timeless jewel.

**LAB OLIVE  
2023**

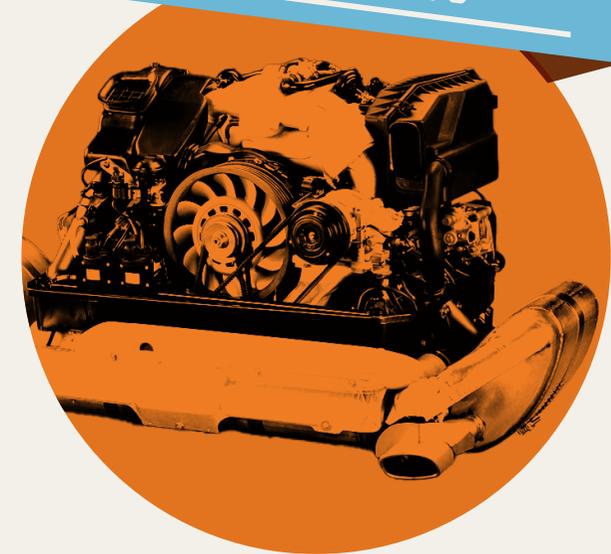

The Lab model owes its name to its predominant characteristic: the “Olive” color, an original shade adopted by Porsche to present the first example of the S/T in the early 1970s. The legend comes back to life.
